The Africa Peering and Interconnection Forum (AfPIF) 2013 starts today in Casablanca, Morocco. This three-day event starts with a one day training programme followed by a two-day forum that aims to address the key Interconnection opportunities and challenges that exist in the region.

The theme for this year's event is: **Policy Implementation and the Regional Content Factor**

AFRINIC is represented on panels at the Forum by Nishal Goburdhan, Senior Project Manager and Hisham Ibrahim, IPv6 Programme Manager.

AFRINIC is proud to be a Gold Sponsor of AfPIF 2013.

Posting Questions:
[Option 1]: Questions can be posted below the live video stream session.
[Option 2]: Using twitter hashtag #afpif2013

The Africa Peering and Interconnection Forum
(AfPIF) addresses the key interconnection, peering,
and traffic exchange opportunities and challenges on
the continent. More information on AfPIF-2013 is

available at http://www.internetsociety.org/afpif-2013/

AfPIF aims to foster national and cross-border interconnection opportunities by providing a forum where key players from infrastructure and service providers, IXPs, regulators and policy makers can engage in a relaxed but business like environment, sharing their experiences and learning from experts in the field.
