

**REPORT on Appeal against the consensus determination on proposal AFPUB-2019-V4-003-DRAFT04
(Resource Transfer Policy)**

On 23th of Dec. 2021 , the Appeal Committee met and discussed the substantive of the appeal bearing reference **AF PUB-2019-V4-003-DRAFT04**, and is thus of the opinion that the present appeal is valid for the following reasons:

- (a) Chairs declare rough consensus and move the proposal to the last call period pretending that an updated version “would be posted” with co-chairs suggested amendments.
- (b) This is a procedural error violating section 3.4.3 of the CPM.
- (c) Appellants and other members discussed with the chairs that the final review is not enough discussed as the authors send updates during the last call period.
- (d) The appellants files various procedural and other issues related to the followed procedures by the PDWG Co-chairs, however the Appeal Committee only considers written issues related to the appeal subject.

Based on the narrative stated above, the Appeal committee decided that Co-chairs erred in their declaration of consensus at the end of the Last Call period, and therefore annulled the co-chairs decisions announced on Oct. 7th, 2020.
